DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 28, 29, 31, 32 and 34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 28, 29 and 31 recite that the mode selection means may control the supply of power in one of four modes of operation. The original disclosure, however, states that the system may operate in one of three modes, where the first mode equates to an RF coupled energy only mode, the second mode equates to a back-up rechargeable power supply/source only mode, and the third mode equates to a combination of both the first and second mode (see for example page 20 of the Remarks submitted Dec. 18, 2009). Option (d) as now claimed, is broader in scope than what was originally disclosed. Option (d) allows for the implanted device to be operated simultaneously from both the rechargeable power supply and the transmitted RF energy, whereas as originally disclosed, the mode selection means required the power to alternate between RF energy and the rechargeable power supply.

There is no discussion in the original specification of the mode selection means differentiating between an RF coupled energy mode (claimed option "c") and a mode where one may simultaneously operate the implanted medical device and recharge the rechargeable power supply from the transmitted energy (claimed option "a"). The section of original disclosure referenced by the applicant on page 21 of the Remarks (col. 9, of the '313 patent) in an effort to address the 112, first paragraph rejection, does not indicate that one can select between option (a) and option (c). It appears to disclose that if option (c) is selected, then by default the rechargeable power source is charged.

Response to Arguments

3. Applicant's arguments filed December 18, 2009 and March 23, 2010 have been fully considered but they are not persuasive. Regarding the rejection of claims 28, 29, 31, 32 and 34 under 35 U.S.C. §112, first paragraph, note the comments above.

While the examiner does not agree with the applicants' arguments presented on page 17 of the Remarks dated December 18, 2009, the amendment to claims 28, 29 and 31 eliminating the language pertaining to the selection means being located in the receiving means has rendered the various objections and/or rejections moot as discussed in the third, full paragraph of page 18 of the Remarks.

Any rejection or objection not explicitly discussed above has been overcome by the applicants' response.

Allowable Subject Matter

4. Claims 1-27 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
